DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mishrilal Jain on December 20, 2007.

The application has been amended as follows:

IN THE CLAIMS:

- Claim 4, line 2, delete "claim 3" and insert --claim 2--.
- Cancel claims 10 and 13.

Allowable Subject Matter

3. Claims 1, 2, 4-8, 12, 14, 16, and 17 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent claim 1, the declaration filed December 6, 2007 demonstrates that powders prepared by a centrifugal atomization process having the claimed oxygen content (0.2-4 vol%) are different than, and unobvious from, powders prepared according to the process of the closest prior art, the Suzuki reference (3-600 ppm oxygen). The declaration compares oxygen values of 0.05% (approximate upper endpoint of Suzuki) and 0.20% (lower endpoint of claim 1) with the result that the aspect ratio of the former is 1.32 and the aspect ratio of the latter is 1.58. Such a result is also not fairly suggested by the Suzuki reference, since the reference teaches that oxygen content of less than 3 ppm results in particles of "non-uniform shape," but is silent regarding particle shape when the oxygen content exceeds 600 ppm. As such, Suzuki does not fairly suggest the deviation from a spherical shape as shown in the declaration, and the declaration is therefore considered to distinguish claim 1 over Suzuki.
